Introduction

To protect timekeepers, officials and competitors it has been necessary to change the way timing and results are operated on events. Instead of handing over your time cards at each control it will be necessary for the crew to fill in their own paperwork. This is for your own record. The actual results will be calculated from the times automatically transmitted from the clocks or the check sheets.

Aims

- Reduce interaction between timekeepers and competitors
- Reduce the number of timekeeper marshals required.
- Reduce contact between the results team and competitors.

Touchpoints

The current method of rally timekeeping relies on a marshal filling in the competitor time card at each control. This means that each time card will pass through a minimum of 7 different people by the time it gets back to the results office, which would be a perfect route for any virus to spread.

The following is a walkthrough of each control:

MTC / ATC

A large time of day display will show a running clock as you arrive.

The marshal will stop the clock and enter your vehicle number when you reach the red control board.

If you are unable to reach the board because of a queue, stay in your vehicle, it will be dealt with once you get to the board. The marshal will not be able to wander down the line of waiting cars because the equipment is not easily moved.

The display will freeze and show just HH:MM:00

If this is not the time required by you because of some holdup on the stage, discuss with the marshal who can make an adjustment.

Write this time on your timecard.

If you arrive early, you will receive a penalty, this is non-negotiable.

If a nominated start time is required, it should be calculated by the you as 3 minutes after the arrival time, or as instructed on the time cards. Note that this event is running at 30 second intervals.

Start

The Stage start will have a time display as well as traffic light indicators. This may be a single unit or two separate displays.

As you approach the start the display will show your start time. Quickly write this on your timecard.

If you are in a queue of cars you should be able to deduce and write down your start time before approaching the start based on the times given to the cars in front.

Initially the display will show dashes

Each 10s will be shown as a countdown

The RED will illuminate with 15s to go

Amber lights will come on at 10s to go

Red goes out with 5s left

last 5s counted on the amber LEDs

The green light comes on when time to go (12:57:30).

Timing will start at the point the green light is shown, irrespective of if the co-driver has actually finished with the paperwork!

Start Alignment

Alignment lights may be used to ensure you are correctly positioned. Watch the arrows for instruction.

Move forward

Just right. Stop

Too far, move back

If you are too far forward at the point the traffic lights turn green you will receive an automatic jump start penalty.

Flying Finish

Well done, you completed the stage, keep going and prepare to stop at the red STOP board

Stop Line

A display similar to the above will be used at the stop line to show your car number and the time you passed the flying finish

If it is not your car number shown, wait for the marshal's instructions before writing down the time.

Write the time down quickly and move away from the stop line to allow for the next competitor arriving.

Service in, regroup, restart times

Service out times will be shown on an LED display as you arrive. The display may include vehicle number or just HH:MM:SS.

The display will show ----- until the marshal enters your car number.

Simply write your time down on your time card so you know when you are required at the next stage arrival control.

Queries.

Queries regarding times and penalties can only be done electronically using a mobile phone to upload your problem to the results service. Check the Road Book for details. You may also telephone the Secretary of the Meeting (telephone number in Final Instructions) to tell him that you have raised a query.

The following information is essential:

Your name

Car number

Stage

Details of the query
